...with a Community Watershed Stewardship G

Community Watershed Stewardship Program

Environmental Services works with Portland State University, Americorps, local watershed councils and the community to raise awareness of and to improve watershed health. We offer community project grants, educational workshops, technical assistance, watershed council organizational development and informational resources.

Our watershed stewardship grants provide up to \$5,000 to schools, churches, community organizations for projects that protect and enhance watershed health at the local level. Groups can use grant money for supplies, materials, equipment, and rentals, feasibility studies or technical assistance.

Past projects include education and monitoring, ecoroofs, stormwater features restoration, and naturoscaping.

Community Watershed Stewardship Project Types

Ecoroofs

Vegetated roof systems that replace conventional roofs and collect, filter and evaporate rainfall reduce stormwater runoff.

(Friends of Portland Community

Gardens Kiosk Project, Friends of Trees Holistic Stormwater Demonstration, People's Food Cooperative, Hawthorne Youth Hostel)

Hawthorne Youth Hostel ecoro

Stormwater Features

On-site stormwater management through "green" practices is vital to Portland's watershed health. These projects on developed sites include anything from swales and disconnected downspouts to pervious pavers.

(St. Philip Neri Bioswale, David Douglas High School Downspout Disconnect, Sabin Community Playground Improvement Project)

landscaped swale

Education/ Monitoring

Innovative workshops, curricula, video, creative writing, art projects, special events, interpretive signs and data collection for watershed projects are essential to creating a community of watershed stewards.

(Zenger Farm - Wetland Education, Open Meadow Columbia Slough Monitoring, Willamette Riverkeeper - Clean Boater Action Guides, Saturday Academy - North Portland Tree Stewardship)

wetland education

Restoration

These natural area projects focus on removing invasive plants, planting native vegetation, and ongoing site maintenance.

(Portland Community College - Restoration of Sylvania Park, Bridlemile Creek Stewards - Albert

Kelly Park Restoration, Lents
Springwater Corridor Restoration)

restoration project

Naturescaping

Naturescaping on community sites demonstrates the importance of landscaping with native plants.

Oregon grape

and natural areas. The health of our waterways can only be protected improved through the wise actions and choices of individuals like you. the steps you personally take may seem simple, when combined with of the community's efforts the results are incredible.
